1 KHTMLSettings

1.1 Using KHTMLSettings

The HTML settings plugin can be accessed in the Konqueror menubar under Tools → HTML Settings. Below is a list of the settings and a short description of each one.

JavaScript Allows you to turn the use of JavaScript in Konqueror on or off.

Java Allows you to turn the use of Java™ in Konqueror on or off.

Cookies Allows you to turn the use of Cookies in Konqueror on or off.

Plugins Allows you to turn the use of the Konqueror plugins you have installed on or off.

Autoload Images Allows you to turn on or off the loading of images in web pages.

Enable Proxy Allows you to enable or disable the use of a proxy in the Konqueror browser.

Enable Cache Allows you to enable or disable the use of cache in the Konqueror browser.

Cache Policy The Cache Policy submenu provides you with a way to configure the how Konqueror uses cache. The possible uses include:

- Keep Cache in Sync
- Use Cache if Possible
- Offline Browsing Mode
